2. Course Description

《Financial & Management Accounting》 is the elective module for undergraduate students majored in accounting. From the global and sustainable perspective, it introduces basic concepts and principles for both financial and management accounting. Based on it, it interprets basic financial statements such as balance sheet, income

statement and statement of cash flow. After the study, students should be able to prepare financial statements, fulfill different decision makings such as marketing decisions and production decisions with accounting information. Then students can increase their practical capabilities.

3. Course Objectives and Requirements

1. **Course Objectives** : Let students learn both conceptual theory and practical technique of financial accounting and management accounting within a firm. Through various problems and cases, students should be able to arrive at optimal financial decision-making from economic information, including financial statements preparation and analysis. It is to increase students' major English and professional quality.

2. **Requirements** : Before this course, students should have studied about management science. During the course, students should preview material, finish and submit assignments in time.
